

ANCHOR

tapes that get the **JOB DONE**

BT100, T226, T227, and T136

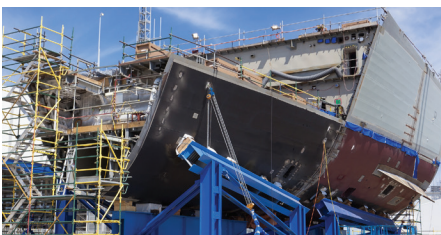

Protect your assets with IPG's Anchor brand full line of heavy duty, rubber backed tapes. Constructed with your industrial media blast and sandblasting needs in mind, our BT100 and BlastLite series tapes are ideal for protection during PMB blast, dry strip paint removal, shot peening and other surface protection applications. Unlike vinyl, IPG's blasting tapes do not contain PVC and can be safely cut using laser method.

FEATURES & BENEFITS

- Heavy duty and durable
- Remains flexible and resists cracking and lifting
- Clean removal from variety of surfaces
- Can be cut by knife for precise fit

SURFACE PROTECTION APPLICATIONS

- Paint stripping
- PMB blast
- Shot peening
- Sandblasting
- Aluminum oxide
- Metal processing and preparation
- Laser peening
- Glass bead
- Dry strip paint removal
- Overspray
- Gaskets

PRODUCT ATTRIBUTES

| Style | Adhesive Type | Total Thickness (mil) | Liner | Product Application | Available Sizes |
|-------|---------------|-----------------------|-----------|--|--|
| BT100 | Acrylic | 46 | White SCK | Ideal for plastic media blasting (PMB) | 30", 25", 12.5", 6", 4", 3", 2", 1", .5", and .75" x 10yds |
